Free Traders Routed.

The free traders in Congress are a dirconsolate act of men at the present time. Only a few months ago Chairman Mills was carrying things with a high hand in the House and any Democrat who had the courage to stand up for his convictions and oppose the free trade bill was subjected to discipline of the most arbitrary charncier. Mr. Randall was read out of the party and the President undertook the punishment of Mr. Sowden, vetoing his public building bill in drier to illustrate the danger of conflicting with the pet scheme of the Chief Executive. So great was the pressure brought to bear that when it came to a test vote only four Demcorats dared oppose the measure. The diaboned victory thus secured was halled with joy in the free trade press of the Passadumkeag log Driving Co. country as a forerunner of the more important victory which they positively predicted would follow when the question went to the people. The tariff smanhers, however, received a disagreeable surprise. Instead of the triumph they so confidently counted upon, Cleveland and his followers were overwholmed with popular disapproval and a Republican President and Republican Congress elected. The affect of this has been to remove the shackies Cleveland, Carlinic, Mills & Co., had forced upon the Democratic House on her new repudiated the old regime. Chairman Mills has been routed and blo forest so demoralised that they now give mot. It his piport to the Boston Bernie

to the extremity of posing before the surplus which he implified prior to the election was a mesace to the welfare or institutions. The papers that have b so much to say about the growth of harist reform should study the situation as flected from Washington.
